

SANITISING PANASONIC TOUGHBOOK

CLEANING & SANITISING PANASONIC TOUGHBOOK LAPTOPS, TABLETS AND HANDHELDS

When working in various industries such as food processing, research, healthcare and chemical processing, it is critical that professionals keep their equipment clean and sanitised to reduce or eliminate the spread of bacteria and germs. The same rule applies to a computer, tablet or handheld device as they are constantly in contact with user's hands and can potentially become contaminated.

Panasonic has intensively tested a number of common disinfectant solutions for usability on Toughbook laptops, going above and beyond typical testing procedures to create and test worst-case scenarios. Examples include a robotic wipes test repeated over 10,000 times with 1Kg/cm² force. Panasonic's commitment to provide not only the most durable and reliable mobile computing solutions for the healthcare industry, but also the most comprehensive product support. Like all Tough devices, they are designed to uplift productivity and lower the total cost of ownership. Our goal is to ensure that any disinfectant solutions we recommend will ensure you years of trouble-free Toughbook laptop operation.

TOUGHBOOK

DISINFECTANT 'WIPES' RECOMMENDED

NOT JUST TROUBLE FREE, GERM-FREE

Panasonic recommends that only the 'wipe' form of disinfectant solutions listed here to be used. Our extensive testing has shown prolonged exposure to chemicals from sprays, soaking and submersion can result in oxidation on various parts of the laptop, paint discoloration and even the failure of seals used in laptop. When using wipe cleaners, the surface should be dried soon after the solution is applied.

* Note: Visible change in appearance was noted after 10,000 wipes under testing done by Panasonic.

With normal use, none of the wipe disinfectants listed in the chart should damage a Toughbook device. However, please be sure to dry the surface soon after the solution is applied otherwise the surface quality of the device may change. Although Panasonic has rigorously tested the wipe disinfectant solutions for the laptop damage potential, Panasonic does not endorse the disinfectants listed nor warrant their effectiveness.
